Patent No. 5817796
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Braper, Kenneth
APPLICANT: Draper, Kenneth
APPLICANT: Jarvis, Thale
TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR
TITLE OF INVENTION: TREATMENT OF REGIENCES
TITLE OF INVENTION: CANCER USING RIBOZYMES
NUMBER OF SEQUENCES: 2627
CORRESPONDENCE ADDRESS:
ADDRESSEE: Lyon & Lyon
STREET: 633 West Fifth Street
STREET: Suite 4700

Sequence 12, Application US/09203716

Patent No. 6001653

GENERAL INFORMATION:

APPLICANT: Crooke, Stanley T.

APPLICANT: Lima, Walter F.

APPLICANT: Lima, Walter F.

APPLICANT: Mu, Hongjiang

TITLE OF INVENTION Human RNase H Compositions and Uses Thereof

FILE REFERENCE: ISPH-033

CURRENT APPLICATION NUMBER: US/09/203,716

CURRENT FILING DATE: 1998-12-02

BARLIER PAPLICATION NUMBER: 60/067,458

BARLIER PAPLICATION NUMBER: 1209-12-04

NUMBER OF SEQ ID NOS: 12

SOFTWARE: PatentIn Ver. 2.0

SEQ ID NO 12

18-GENERAL INFORMATION:
Patent No. 605158

PAPPLICANT: Achtar: Saghir
PAPLICANT: Achtar: Saghir
APPLICANT: McSwiggen, James

TITLE OF INVENTION: ENTEWATION OF DISEASES OR CONDITIONS RELATED

TITLE OF INVENTION: TO LEVELS OF EPIDERMAL GROWTH

TITLE OF INVENTION: PACTOR RECEPTORS

NUMBER OF SEQUENCES: 1877

CORRESPONDENCE ADDRESS:

ADDRESSER: Lyon

STREET: Suite 4700
                                                                                                                                                       COMPOTER READABLE FORM:
MEDIUM TYPE: Ploppy disk

                                                                                                                                                                                                                                 Sequence 2, Application US/08870608
Patent No. 6107094
GENERAL INFORMATION:
APPLICANT: Stanley T. Crooke
TITLE OF INVENTION: Oligonuclectides And Ribonucleases For Cleaving
TITLE OF INVENTION: RNA
NUMBER OF SEQUENCES: 8
CORRESPONDENCE ADDRESS:
ADDRESSEE: Woodcock Washburn Kurtz Mackiewicz & No. 6107094ris LLP
STREET: One Liberty Place - 46th Floor

; Sequence 7501, Application US/08584040
; Patent No. 6346398
; GENERAL INFORMATION:
; GENERAL INFORMATION:
; APPLICANT: Bavco, Pamela
APPLICANT: Stinchcomb, Dan T.
APPLICANT: GEOCHGO, Jame
TITLE OF INVENTION: TREATMENT OF DISEASES OR
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: GROWTH FACTOR
NUMBER OF SEQUENCES: 8502
CORRESPONDENCE ADDRESS:
ADDRESSEE: Lyon & Lyon
STREET: SA3 West Fifth Street
STREET: SA1 West Fifth Street
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      CITI:

Sequence 3133, Application US/09371772B

Sequence 3133, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:
APPLICANT: Ribozyme:
APPLICANT: Ribozyme:
APPLICANT: Stinchcomb, Dan
APPLICANT: Stinchcomb, Jaime
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Rel
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Rel
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases
TITLE OF INVENTION: NUMBER: US/09/371,772B
CURRENT FILING DATE: 1995-08-10-26
PRIOR FILING DATE: 1995-08-10-26
PRIOR FILING DATE: 1995-01-08
NUMBER OF SEQ ID NOS: 14225
SOFTWARE: PatentIn version 3.0
SEQ ID NO 3133
LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               GENERAL INFORMATION:
APPLICANT: RIPLOZYME Pharmaceuticals, Inc.
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Bavoo, Pam
APPLICANT: Bavoo, Dam
APPLICANT: Barobedo, Jaime
APPLICANT: Bacobedo, Jaime
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re]
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
PILE REPERENCE: MBHB00, 876-J (23/118)
CURRENT APPLICATION NUMBER: US/09/371,772B
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ö

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 3040, Application US/09371772B
Sequence 3040, Application US/09371772B
Patent No. 6566127
GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Pavco, Pam
APPLICANT: Bacoco, Dam
APPLICANT: Stinchcomb, Dan
APPLICANT: Stinchcomb, Dan
APPLICANT: Scobedo, Jaime
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions F
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
FILE REFERENCE: MEHBOO, 876-J (237/198)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ö

Sequence 398, Application US/09476387

Patent No. 6617438

GENERAL INFORMATION:
APPLICANT: Reigelman, Leo
APPLICANT: Beaudry, Amber
APPLICANT: Beaudry, Amber
APPLICANT: Adamic, Jasenka Matulic
APPLICANT: Sweedler, Dave
APPLICANT: Sweedler, Dave
APPLICANT: Amber Shaw
TITLE OF INVENTION: Nucleotide Triphosphate and their Incorporation into Oligonucleot
FILE REFERENCE: MBHB00-831-C (249/073)
CURRENT FILING DATE: 2001-04-04

PRIOR PILING DATE: 1999-12-29

PRIOR FILING DATE: 1999-04-28

PRIOR FILING DATE: 1999-04-28
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Gaps
